Topo para Boulder en Hatun Machay (2nd Edition)

Scott Drumm 2013

Jonny Summers cleaning "Frankenstein's Journey to Jah " in the Rastaman School Sector

This topo is dedicated to all of the amazing people whom I have met in my two stays at Hatun Machay. A very special thanks goes out to Jonny Summers, Pablo Mirando and Chris Sierzant for all of their help and motivation supplied with the development of the boulders. There are endless possibilities for new boulder problems in Hatun Machay. It is my hope that this topo will inspire more people to develop this amazing area to it's full potential.

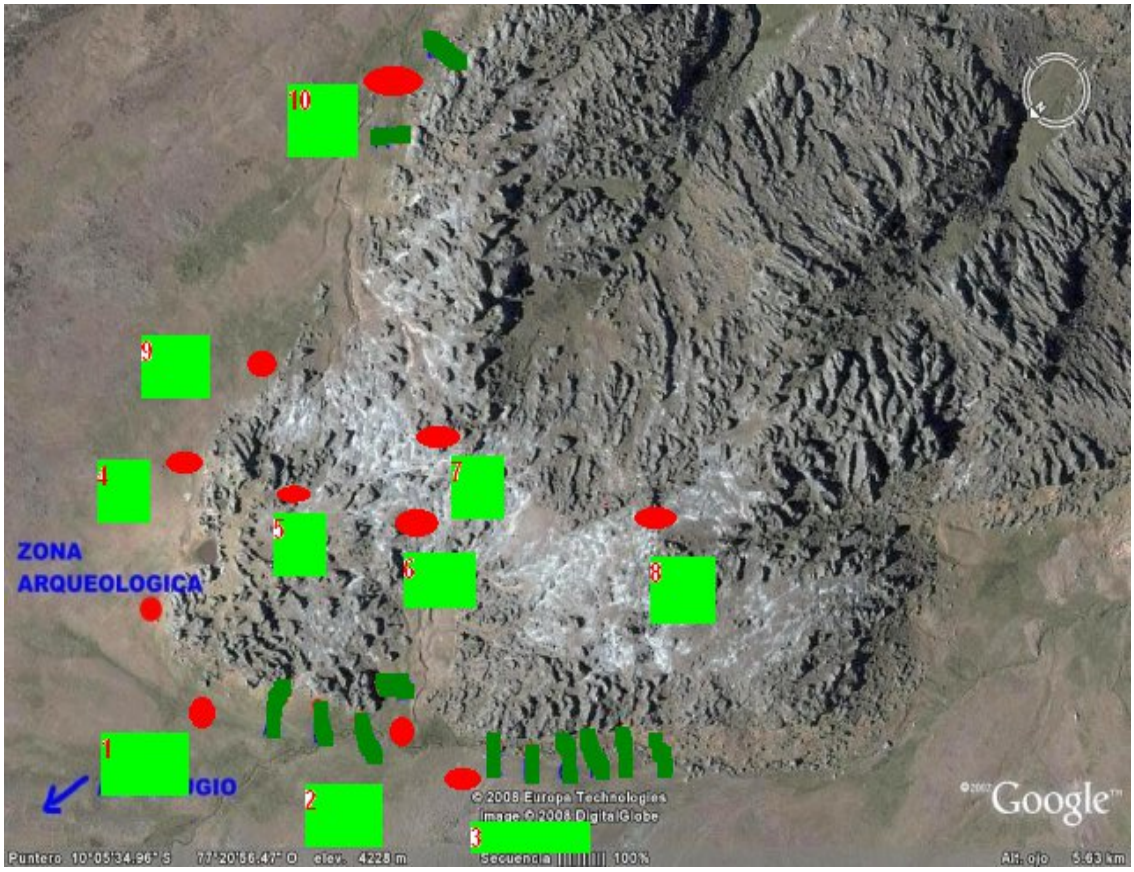

- Scott Drumm 2012

Note: Problems listed as "Unknown" were established before I arrived. If you have information on these problems, you are free to change the information in the topo. If you feel any of the grades in the topo are wrong, you are also free to change them.

2013 Note: I was unable to obtain a GPS for all of the new boulders that were cleaned/established this year. However, all of them are easy to find and within short walking-distance of the other boulders within each respective area that they are located.
